

NEW!

Turbo Mode for CO Detection

Does your process have a need for speed?

Choose the new Turbo Mode option for HALO 3 and Spark+ for a T90 response time of <10 seconds!

Key advantages:

- Fastest response time for CO (<10 sec)
- No moving parts—insensitive to vibrations
- Drift-free, permanent zero calibration
- High specificity—no interferences
- Lowest cost of ownership—No periodic part replacements or maintenance

HALO 3 & Spark+ Detection Limits with Turbo Mode:

CO Detection	HALO 3 CO Detection Limit (LDL), 3σ/24h	Spark+ CO Detection Limit (LDL), 3σ/24h
in N ₂	120 ppb	360 ppb
in H ₂	150 ppb	450 ppb
